## PRAYER PETITIONS FOR THIS COMMUNITY

1. We pray that Maritza, a lady from the San Miguel Community may experience a miracle through surgery and be able to walk again.
2. We also request prayer for the Body of Christ in San Miguel, that they may be united at all times.
3. We pray for a school building in San Miguel. Children are in great need of this project so that they can attend classes in a safe environment.
4. We ask in prayer for a miracle for Dona Maria who is in need of hip surgery.
5. We pray for all the children of San Miguel, so that they may be blessed and protected at all times.

## HIGHLIGHT STORY

We were able to meet Maritza during our visit to the San Miguel community. She is a 20-year-old girl who is disabled in both legs due to a bad fall she had when she recently had given birth to her child; she was 19 years old at the time.

During our time this week, the Hygiene team and the team from Calvary Church both felt in their hearts the need to purchase a wheel chair for this young lady, not knowing that the one she was using was in fact borrowed.

God is indeed good and he loves to use His children to bless others in need. The young lady was beyond happy for the gift given to her and we praise Jesus for the miracles we are able to witness every day at the field. We are believing for a miracle in Maritza Martinez's life.

The Agua Viva team installed the machinery in the San Miguel Community, located in El Progreso, Yoro. This community was in need to access clean water, like many other communities in the northern zone of Honduras. Water in several areas of Honduras can be scarce, especially during the summer time, and we understand that water is vital to live.

**Agua Viva**  
**INTERNACIONAL**

12

oravihonduras.org

Organización Religiosa Agua Viva Internacional

oravihonduras

The San Miguel Community only had access to the water provided by this river. Usually, women and children are the ones who collect the water to take to their homes. Unfortunately, this practice can be dangerous, since the water collected is not proper for human consumption. Animals use the water to bathe and drink, and people also use it to wash their clothes, and in some cases the dishes.

In addition, children lose precious time that can be used for their education, collecting water for their families, and the ladies too, among other disadvantages collecting water from a river carry.

The Agua Viva team and the Calvary Church team were both very well received by the community, and the excitement was shared among everyone.

In addition to the drilling process, the Health team had the opportunity to join the Calvary Church team and prepare lessons for the children and the ladies from this community regarding health, hygiene, and most importantly, lessons about God's love towards us.

Every activity we prepare in the field is an excellent opportunity to share the Word of God with everyone we encounter, and truly God manifests His glory in various ways.

**Agua Viva**

The ladies and children were excited to be a part of this program. We are aware that women face several challenges, and are in need of being heard and supported. During the JOY lessons, the health team takes time to listen to the women's stories, and we take that time as an opportunity to pray for their needs, and God provides in beautiful ways.
